

February 2026

## TEMPCO Electric Heater Corporation REACH Statement

REACH (Regulation for Registration, Evaluation, Authorization, and Restriction of Chemicals) is a regulation of the European Union. The main objective of REACH is to protect human health and the environment from the risks of chemicals.

REACH requires suppliers to inform customers if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. If a substance is identified as an SVHC, it is added to a Candidate List for eventual inclusion in an Authorization List.

The EU announced on February 4th, 2026 an updated candidate list containing 253 SVHC chemicals. The list can be found at: <https://echa.europa.eu/candidate-list-table>.

Based on the material content certifications provided by Tempco's suppliers, one SVHC substance (lead) is present in brass components which may be as high as 3% by weight. No other SVHC substances are present in the materials we use in our products, including packing and shipping materials. Hence, Tempco products do not contain any of these SVHC candidates in excess of 0.1% by weight with the exception of brass components noted above.

TEMPCO will continue to comply with REACH requirements and update this document, and notify our customers if, and when, any changes take place.

Samir Patel  
VP of Engineering & Quality
