

February 2026

**Subject: Declaration of non-use of Persistent Organic Pollutants (POPs) covered by Regulation (EU)2019/1021**

Dear Valued Customer,

Persistent Organic Pollutants (POPs), such as pesticides and some industry chemicals, which can be transported across international boundaries far from their sources and persist in the environment, bioaccumulate through the food web and pose a risk to human health and the environment. The continuous release of POPs into the environment has been of serious concern to the European Union since Regulation (EC) No 850/2004 of the European Parliament and the Council on POPs entered into force in 2004. After being amended several times, the POPs regulation was cast into Regulation (EU) 2019/1021 OF THE European Parliament ND Council in 2019.

Tempco Electric Heater Corporation, as a Manufacturer of Electric Heating Elements, Temperature Controllers, Temperature Sensors & Turnkey Process Heating Systems, has been aware of the responsibilities for protecting the environment and human health.

Based on the verified information, we declare, to our best knowledge, Tempco products are in compliance with POPs Regulation and do not contain substances subject to prohibitions listed in Annex I to Regulation (EU) 2019/1021, as amended. We continue to follow the update of the POPs Regulation and ensure the conformity of our products.

Please contact the undersigned if you have any questions. Contact information is noted below. Thank you for your follow-up.

Samir Patel  
VP of Engineering & Quality  
Tempco Electric Heater Corporation
